

Blinkit Sales Analysis

Business Requirements

Project Overview

The objective of this project is to analyze Blinkit's sales data and build an interactive Power BI dashboard that provides valuable insights into product performance, customer preferences, and outlet efficiency. The dashboard will help stakeholders monitor key business metrics and make data-driven decisions.

Key Performance Indicators (KPIs)

1. Total Sales

Measures the overall revenue generated from all products sold across Blinkit outlets.

2. Average Sales

Represents the average sales value achieved per transaction.

3. Number of Items Sold

Displays the total quantity of items purchased by customers.

4. Average Customer Rating

Shows the average rating given by customers, helping evaluate product quality and customer satisfaction.

Dashboard Requirements

1.Fat Content Analysis

Objective: Evaluate the contribution of Low Fat and Regular products to total sales.

Chart Type: Donut Chart

2.Sales by Item Type

Objective: Identify the best-performing product categories based on revenue generation.

Chart Type: Bar Chart

3.Outlet Establishment Analysis

Objective: Analyze sales trends according to outlet establishment years and understand business growth over time.

Chart Type: Line Chart

4.Outlet Size Analysis

Objective: Compare sales performance among Small, Medium, and High-sized outlets.

Chart Type: Donut Chart

5.Outlet Location Analysis

Objective: Assess how different outlet locations contribute to total sales.

Chart Type: Funnel Chart

6.Outlet Type Performance

Objective: Compare outlet types using key business metrics such as sales, ratings, and item count.

Chart Type: Matrix Table

Business Objectives

- Identify top-selling product categories.
- Understand customer preferences based on product attributes.
- Evaluate the impact of outlet size and location on sales.
- Track outlet performance across different business metrics.
- Monitor customer satisfaction using rating analysis.
- Support strategic decisions related to inventory and outlet management.

Expected Insights

- Which product category generates the highest revenue.
- Performance comparison between Low Fat and Regular products.
- Most profitable outlet locations and outlet sizes.
- Sales contribution of different outlet types.
- Historical sales trends based on outlet establishment years.

- Relationship between sales volume and customer ratings.

Conclusion

The Blinkit Sales Analysis Dashboard provides a comprehensive view of sales performance, product demand, and outlet efficiency. By leveraging Power BI visualizations and KPIs, the dashboard enables business users to uncover trends, optimize operations, and improve overall decision-making.
